

Content

Research on designing and developing an experimental model of a conveyor assisted by a robotic arm. SIMA Andreea Valeria, SAVU Tom, ENCIU Cornel-Cristian	1
Design and implementation of an experimental equipment model for adhesive deposition on curved trajectories DOGEANU Ileana-Georgiana, SAVU Tom	7
Designing and implementing an experimental model system for capturing and processing images of cereal crops DUMITRU Andrei-Marius, SAVU Tom, GHEORGHITĂ Vlad	13
Designing an algorithm and a computer application for recording a team's progress in completing a dissertation work RĂDULESCU Nicoleta-Cristina, SAVU Tom	19
Database and web interface for software application for assignment of process tasks in technological operations CIOCAN Cristian-Florin, CATANĂ Mădălin-Gabriel	23
Database and web interface for supply planning computer application with production materials from supplier BUJDOIU Radu-Marian, CATANĂ Madalin-Gabriel	29
Designing and manufacturing of an articulated robotic arm VLASE Adrian-Ionuț, TARBĂ Ioan-Cristian	35
Research on designing and developing an experimental model of a snow removal robot STĂNCILĂ Andra-Elena, TARBĂ Ioan-Cristian	41
Design and realization of an experimental model of automation system for dough dosing STAN Bianca Alexandra, GHIONEA Gabriel Ionuț	47
Design and realization of an experimental model of a modular product sorting system GEANTĂ Florin-Adrian, GHEORGHITĂ Vlad	53
Designing and implementing an experimental model of a system for inventorying cutting tools TOMA Ștefan-Mădălin, TARBĂ Ioan-Cristian	59
Designing an algorithm and developing an information system to automate the flow of documents required for field practice activities. IVAN Emanuel, GHEORGHITĂ Vlad	65
Research on designing and developing an automated system for controlling the solar panels NEACȘU Ana-Maria, TARBĂ Ioan-Cristian	71
Hydrogen Electric Bike SINESCU Robert Cosmin, GĂINĂ Nicoleta Lavinia, IVĂNESCU Eugen Bogdan, NICULESCU Cristiana Cătălina, OPRAN Constantin Gheorghe	77
Research on establishing the concept for the orientation of an autonomous vehicle BADEA Georgiana-Denisa, DINU Mădălina-Elena, MILOIU Andrei-Nicolae, FĂTU Andrei-Marian, VLAD Mihaela-Marilena, Tom SAVU	85
Performance analysis of a dual-axis solar tracker for photovoltaic applications TARCHICHI Amer Adel, IONITA Andrei, GRIGORE Ana-Maria	93

Scientific research on the development of a pair of robotic arms for communication with hearing deficits STAN Cristina, DRĂGHICIU Ionel, PÎRVAN Răzvan, ROȘOAGĂ Andrei, VINTILĂ Sabin, PRISECEANU Alexandru, Cristian DOICIN	99
Research on sustainable recycling and applications on metallic products. MAHMOUD Samira-Ariana, BEBLIUC Andreea-Diana, ȘTEFAN Cătălin-Andrei, Marian GHEORGHE, Ovidiu BLĂJINĂ, Manuela-Roxana DIJMĂRESCU and Dragoș ILIESCU	107
Contributions regarding the development of an augmented reality application for the medical field NICULAE Andrei – Lucian, ULMEANU Mihaela – Elena	113
Research on obtaining metallic parts using additive manufacturing technologies ENE Elena, PARASCHIV Alexandru and DIJMARESCU Manuela-Roxana	119
Study about relationship between observer and product design TEODORESCU Adina, Andrei DUMITRESCU	125
Research on topological optimization of floating support obtained through additive manufacturing DRĂGAN Adrian – Nicolae, ULMEANU Mihaela – Elena, IONESCU Nicolae	131
Comparative study on typologies of human needs RUSEN Andreea-Georgiana and DUMITRESCU Andrei	137
Research on the efficiency of an investment in virtual currencies BĂZĂVAN Maria-Alexandra and DOICIN Cristian-Vasile	143
Study on the need for unique products SANDU Fulvia Andreea and DUMITRESCU Andrei	149
Research on computer applications for managing freight shipments in a factory COSTACHE Filofteia Bianca	155
Design and realization of an application for measuring response time to visual stimulus CIOCAN Ionuț-Cornel	161
Designing and making an experimental model of a nebulization device for large surface enclosed spaces. ROJIȘTEANU Vlad	165
Design an algorithm for the task allocation of a fleet of autonomous vehicles DIACONU Alex-Gabriel	169
Designing and building an experimental model of a system for measuring the weight and transporting tool SORA Elena-Alexandra, DUGĂEȘESCU Ileana, ENACHE Vlad Cristian	173
Intelligent system for monitoring the circular economy of plastic ODAGIU Serban-Nicolae	179
Designing and implementing an experimental model of an intelligent shelf that monitors environmental conditions for plant growth OANCEA Maria-Emilia	183
Designing an algorithm and developing an integrated navigation system in ROS2 and NAV2 for intralogistics activities with an autonomous mobile robot (AMR) DABIJA Mihai-Daniel, ABAZA Bogdan Felician	189
